Glutamate has been implicated in the development of the neuromuscular junction. However, the glutamate receptors in the junction remain to be completely identified. The present study aimed to characterize expression of ionotropic and metabotropic glutamate receptors (iGluR, mGluR) in mouse motoneurons and at the neuromuscular junction (NMJ). We used Western blot analysis and immunofluorescence histochemistry to characterize glutamate receptor protein in the spinal cord, lumbar spinal cord and sciatic nerve of mice. Western blotting revealed the presence of both NMDA-type iGluR (NR1A1-NR1A4) and non-NMDA iGluR (GluR1-4) in the spinal cord. Antibodies against NR1A1 and NR1A4 revealed a punctate pattern of immunolabeling of the motor neurons. NR2A-C, NR2D, and NR3A-F were not detected in the spinal cord. NR2A-D were expressed in motoneurons, and NR2D was in spinal interneurons. NR3A-F were expressed in the spinal cord. NR1 was expressed in motoneurons and in the muscle. NR3A- ca3bfb1094

The BBC's business editor Robert Peston says if Americans had the same political and regulatory structure as the British they would have better financial regulation and a lower debt burden. He was speaking in his regular weekly column for the New York Times. "A friend and former business associate of mine is a native of Portland, Oregon and he has always felt the same way about his homeland as many other Americans do: he likes many things about it, but he is baffled by its political system. "Why are the political parties so much more interested in gerrymandering than in producing good policy? Why are governors so eager to spend their time campaigning, rather than fixing their states? Why are Americans so willing to elect political hot shots like Donald Trump, when an American president who had the same national celebrity status as Trump is almost certain to get a better government deal from Washington? "These are the sorts of questions that I asked myself when I was thinking about writing this column. "I started wondering why a nation like the United States should not be as well regulated as any other nation on earth. Why shouldn't it have the same kind of political system that most other nations have?" 'Dispute over sand' "I decided that the answer was: not only because Americans would be better off, but because the nation would be better off, too." He went on to explain that a key reason for the differing political culture of the US is that no national party has managed to win an outright majority in national elections for most of the past 100 years. "The big problem for any party with less than half the vote is that it has no way to exert power. It can't form a government with a simple majority of the legislature and a simple majority of the population. Instead, the party that wins the election has to persuade the opposing party to surrender some of its rights in exchange for a promise to support the party's policies.
