It was developed as an extension of the AutoCAD Serial Key drafting program and was released on January 17, 1983 as a desktop computer graphics program. Autodesk marketed AutoCAD Free Download by bundling it with the AutoCAD drafting software, and by encouraging their users to send the trial version to Autodesk. The company later provided free trials in 1993 and 1996. The main goals of the application are to generate a 2D or 3D drawings, manipulate them, and display them. The first version of AutoCAD, released in 1982, could only draw simple 2D linear and angular features and primitives. It could not combine these drawings, nor create them. In 1983, the first version of AutoCAD, with the ability to combine drawings and draw plans, started being available to a limited number of users at Autodesk. Since then, the software has grown from a 2D drafting program to a 3D CAD program. The first 2D versions of AutoCAD were essentially for use in architecture and engineering fields. In the 1990s and 2000s, the software became widely used in the construction and architecture industries, which originally accounted for the vast majority of the users. A relatively small number of users were skilled in AutoCAD, but could not run the application in order to create a drawing. In the 2000s, the software applications began to be used in the energy industry, manufacturing, and other engineering industries, leading to a large increase in the number of AutoCAD users. The early version of AutoCAD only used a single color (primarily blue) and covered the entire screen with that color. The 1970s version of AutoCAD was designed to resemble an old drafting board. The first version of AutoCAD used a green color to illustrate the environment; the following year, the color was changed to blue. AutoCAD 2016 released on January 16, 2016 features a new main menu and new interface, along with many enhancements and updates. Contents show] Features Edit A basic feature of the software is its capability to create a 2D or 3D drawing. AutoCAD is also capable of creating job tickets and presenting them on the screen.
