FIFA 22 will take players on a journey to the heart of the story of the English Premier League with an authentic and unique story mode, in which the player will be able to play as any club, any player and any era. In this mode, gamers will be able to play as their favourite player, choose their team and the era that they want to be a part of. Then, there's the brand new career mode. In this mode, players will take control of a player in the summer of 1988, and guide them through their football journey. Through this journey, you'll be able to choose your own starting position, move up and down the transfer market and your player can grow

their football ability in a range of new ways. After 10 years in the professional game, the player can live out their football fantasy, by winning the UEFA Champions League, taking part in the FIFA Club World Cup or achieving greatness in the UEFA Europa League. FIFA 22 is also getting the "Game Face" mode, which puts the ball at players' feet, and gives them complete control of a virtual player's movement, allowing them to create a complete football experience unlike any game before it. FIFA 22 will also introduce the "Dynamique" engine, which will offer previously-unseen football experiences. This engine will be the culmination of two years of data science research that engineers has conducted to make each aspect of the game feel dynamic, and for individual players to more realistically behave.
