The Car - for the person who loves speed and with a voice for the driver who plays in this game. It is an arcade game with an interesting plot and a great game play, which will make you enjoy the feeling of the driving rhythm. Flavors: The game is set in a car boot which is a funny and exciting place for children and grown ups to meet. There are three parks, which can be created: Autumn, Summer and Winter. Each of them brings us a different flavor and character. In Autumn park there are gardens, with some very amazing animals. In Summer we have the playground, a place to play with our friends and build our cities. And in Winter there are all kinds of winter scenery, like snow and ice. Background: We don't know why do trees grow such beautiful leaves that change in color all year round in just moments. It is still a mystery, but there is nothing to worry about. The free beauty of these leaves will always make us happy. We don't know why do flowers grow such beautiful colors, flowers always look so gorgeous and beautiful, but it's also a mystery. We can only say that flowers are very happy and they spread beauty all around. Animals love plants and flowers. It's amazing, if you think about it. Flowers want to attract insects, who help to pollinate plants. Animals want to meet plants and flowers, who want to attract more insects, to pollinate and to fertilize. And insects want to hunt for prey. Every organism wants to make its life good and to live in harmony. We also want this. Gameplay: Using the accelerometer and the points you collect on each level, you will be able to see how high you can go and how far your car can go. This game has a nice scoring mechanism. Once you have reached a certain score, you will be able to unlock a new level and another car. Each level will test your driving skills and your speed. The powerups that you can collect and each level are: Accelerator: Increase speed. It can be activated only when the car is not in a jump and in a straight line. Powerup: Increases the force of the jumps. Clutch: When you activate the clutch, you will be able to brake in full speed. Use it carefully, because if you don't brake and it's too hard, you will lose it. Ejector: When

The Savior From Above is a sidescrolling 3D adventure with multiple puzzles and action elements inspired by the classic adventure genre. It is set in a sci-fi environment, with a futuristic setting that combines elements of various cultures and mythology. Its gameplay is also a sort of mixture between the elements of various genres, including puzzle, action, exploration and RPG. The game features a tight and complex plot, one of the best written and designed I have read in my past years of game development. The enigmatic and charismatic main character under your control is the last survivor of an intergalactic expedition gone wrong. He is searching for a way to save his friends and his world from a disaster that he is the only one who knows how to stop. Throughout the game, the player will use the characters' special abilities to solve puzzles, fight enemies and solve mysteries on their quest to save the world. The characters are all custom designed and their appearance is based on various mythologies and legends from all over the world. The entire world will be constantly changing throughout the game as the protagonist is going to meet lots of new characters and explore new areas. Main Features: - A unique game narrative that combines the themes of science fiction and fantasy with various mythologies. - More than 20 hours of gameplay in a single campaign. - A complex storyline that is constantly evolving throughout the game. - Custom designed characters with unique and realistic facial expressions and speech patterns. - A distinctive art design that is influenced by various mythologies and legends from all over the world. - Various puzzles and action elements. - Easy and intuitive controls for your platform of choice. - A nice soundtrack to go with the game's atmosphere. - Stunning, hand-crafted 2D and 3D graphics. - Linux, Mac, and Windows compatible. Dedicated Server Description: To play in the dedicated server you need the "dedicatedserver" package downloaded from the official website and it will be listed under your user id. You can download it from the developer's website (link in the website) or type "dedicatedserver" in the search field of your game client. The dedicated server uses OpenAL for sound mixing and uses each player's audio device for sound mixing. It requires a relatively high CPU, but the advantage is that dedicated server will use your full CPU power (no graphics performance loss). Your client should be able to play the game in dedicated mode if you have a dedicated server. _____c9d1549cdd

What's new:

Builder Scene I had wanted a build for the last while in which to try out the new version of RGGames, however, I had my doubts I could get the functionality I had wanted. I wanted to design a challenging, and static dungeon for my dungeon brawler. I like the feel of random encounters but find it difficult to build an environment that would render such encounters interesting without being too repetitive or simply too easy. I was still very keen to purchase the app and have an honest opinion about it. Well, I'm glad I waited, this has been a wonderful experience. Start of with the purchase it was set up and working right away. It was a little clunky for me, but I was getting used to this app. I have been so busy tearing the terrain apart, swapping floors and just messing with everthing, that I have forgotten that I have had little time to actually make the game myself. A few small things before I start. For the campfires on the dungeon floor. I found it odd that the tiles that are touching appear bright, and stay bright, whereas further away from the fire it turns a dark grey. (The fact that the grey is the same value as the background makes it hard to see the difference). I can understand if it had the bright tiles turn white, and the dark grey tiles would be darker than the background, that would be less of an issue. But I didn't find the design flaw that much. I just wanted to mention it. I decided early on to create one room with a pit, and that that would be my dungeon, all other rooms would be on the floor around the edge of the pit. The idea would be that, if you don't want to go into the pit and you want easy cheese, you could take the easy route. If you want to get near cheese, you would have to find a way past the pit. That decision to build an open pit into my dungeon scene worked perfectly, but the actual function it wasn't designed for. I would like to build an approach path next to the pit and have a safe exit. I wanted to create a lot of ramps leading to the edge of the pit, but I kept having my level builder placing them at an odd angle. They would only go one way or the other. I made a simpler dungeon, just a long chute with stairs and ramps leading down into the pit. I realised I have been designing

Dingaling Dungeon is a story driven third person Point & Click adventure game. It's inspired by and pays homage to classic dungeon crawling games from the 1980s such as Diablo, Dungeon Master, Eye of the Beholder, Ultima Underworld and Dungeon Master 2. Dingaling Dungeon introduces a new kind of game play mechanics that are expected to make you want to play even more games in this style. ABOUT CRISPY Crispy is a studio founded by brothers Markus and Niels Ege from Tumwater, Washington. Their mission is to create groundbreaking video games with challenging puzzles, fun gameplay, and awesome characters. Crispy was founded in 2012 and their first release is Dingaling Dungeon, a game that mixes classic gameplay elements with their own fresh ideas. You need Flash or Unity to play this game. For additional information see You have been chosen to go on a dangerous journey to the lost kingdom of the Great Goblin. A dangerous mission with no guarantee of victory. Your journey begins in a stormy sea with no hope of safety if your boat sinks. No time to get your bearings, you have been given a mission to find the Goblins before they do. The quest will take you deep into the woods and past cliffs, through tunnels and underground caverns and over rickety bridges to the end of the goblin tunnels. Fight enemies, solve puzzles and find your way to safety before its too late. This is a game that will challenge you to never give up. This game may be too difficult for some people. So the first three goblins you meet are going to be tricky, even if they don't kill you. Tread carefully and the mission will be yours! This is an adventure game where you choose your own storyline and path to follow. It's an indie game made with the visual feel of a classic adventure game and the gameplay style of a platformer. This is no follow the leader game. As you travel the world you can choose what happens to you and the characters you meet along the way. What secrets you find. Who is after you. What path you take. This is all up to you. Good luck! Game Categories: Adventure, Platform Unleash the power of your brain with this innovative, brain busting platform puzzle adventure game. FEATURES: # multiple endings # multiple paths # multiple ways to play # the satisfaction of an interesting game filled with puzzles #
