. Distributed circuit analysis of equipment containing delta, star, hybrid, or bifilar. The most common single-phase star-delta or wye-delta transformers are. The two-terminal line is. 4 (see e.g., German POW).The best trade? David Price for Jake Peavy David Price only has to face Jake Peavy once this year -- a mid-June collision at Fenway Park. This is a big deal. Price will beat him up, and if the Sox aren't careful they could find themselves losing a game or two to their nemesis. Why did the Red Sox trade Price for Peavy? Let's stipulate that the Red Sox don't need an ace anymore. The rotation has been fixed, in all likelihood. What this new division-leading Red Sox team needs is a steady presence -- someone who can get them through the second half of the season with no more than two or three losses, someone to change the pulse of the offense and return them to living in the present, rather than living in the past. Peavy is that guy. I mean, he's back. Considering the Red Sox's seemingly inexhaustible stockpile of lesser pitchers, this was a no-brainer. Peavy is the best of the bunch, and there was no reason the Red Sox would not have to trade for him, as there wouldn't have been room for him on the active roster. This is a big deal; the question is what price the Red Sox were willing to pay for Peavy. First of all, it wasn't a package deal like the one in which they sent Josh Beckett for Carl Crawford. Certainly not the $154 million deal, although perhaps they would have offered if it was the right price. But it's not really fair to judge either of these teams on short-term free-agent deals made today, because in two years the Red Sox will trade for another ace. That should be the Red Sox's goal, to have at least one ace each year, and if they don't, then they should spend money to acquire another. So let's judge them on the notion that they'll have two -- or three -- aces by 2013, and whatever it takes to get them in 2012. But if I were the Red Sox, I'd ask for a Jake Peavy, David Price, for Price. No questions asked. He has no business being on the roster of a team that has won 0cc13bf012
