As a result, users can apply styles, effects, noises or pads to their music. It's a planned system based on user-friendly communication. I know that you can use music to heal people and animals. At the same time, I know that many people cannot accept music. I remember when I was a little girl, my mother would often tell me stories about life in India, where she said music was used for healing. It was the real India, with its old temples and ancient traditions. I knew my mother had heard this story from someone, too, because neither she nor my grandmother were Indianists.
