September 2, 2021 - If you need a reliable Malayalam typing software solution, we can highly recommend Keymagic, Varamozhi. typeit! or Inkey. These programs are easy to use, have all the features you might need, and can be programmed in many different languages. Many users prefer to use keyboards for typing because they make the typing process easier. But in our case, they give less opportunities. Of course, you can create your own program using the GUI, but for most users it is too complicated.
